

Group Activity - Discuss the implementation surfacing issues and insights

Lynn Robert Carter, PhD

2019-02-27

Activity Kind

Group activity

Purpose

The purpose of this activity is to explore issues that are blocking progress in order to see if others have ideas on how to address them.

Pre-requisite

Students are expected to have participated in:

- Small Group Activity - Discuss the implementation surfacing issues and insights

Tasking

This mentor-led discussion with the whole group is to surface and explore ways of addressing issues various students and small groups are having. It is also common for new ideas to appear that will suggest even better ways of doing things that others believe they have already finished.

Be sure to take notes into your ENB as soon as you hear something interesting, so it does not fade.

Be clear of the goal. You want as impressive a package as possible. The code is important but being able to show the whole flow from requirements, through design, to excellent code will be so much **more** impressive when it is time for the recruiting activities.

Deliverable

Students are responsible for producing and posting their notes in their ENB as evidence that they performed this task as required.

Submission

Each student must produce and submit your ENB for the day.
