

Group Discussion - Remaining risks for the third and fourth week submissions and ideas to address them

Lynn Robert Carter, PhD

2018-02-25

Activity Kind

Group discussion

Purpose

The purpose of this exercise is to leverage the insights of others to help each of us consider new ideas to address problems that are blocking us.

Pre-requisite

Students are expected to current in the class.

Tasking

This mentor-led activity is intended to cross-fertilize the problem-solving power of the other groups for the benefit of the whole class.

What are the major concerns and barriers to progress that remain a concern to the successful completion of the projects for Week 3 and Week 4?

Do not expect the mentor to have answers or solutions. Rather, the mentors are here to help the class draw from their own knowledge and experiences the insights needed to solve these problems.

Students must take notes about what is said and any ideas that pop into their minds. It is amazing how our subconscious works, if you just take the time to pay attention to it and to capture what it tells you before it disappears.

Deliverable

Students are responsible for producing and posting their notes in their ENB as evidence that they performed this task.

Submission

Each student must produce and submit your ENB for the day.
