

Small Group Exercise - Discuss the work that remains, how best to do the work, and any issues

Lynn Robert Carter, PhD

2019-02-27

Activity Kind

Small group exercise

Purpose

The purpose of this exercise is to help you and your work group to develop a clear picture of the work that remains, so you can invest your energies wisely.

Pre-requisite

Students are expected to have participated in:

- Group Activity - Discuss the implementation surfacing issues and insights
- Individual Activity - Refine and refactor your architecture and design

Tasking

As a group, list out the work that remains (brainstorm?) and any serious concerns or barriers that any of you see with those items. Prioritize the list (multi-voting?) and drop off any of the items that did not gain any votes. Capture the information in your ENB.

Go round-robin asking each member of the team to lead the group to address a high priority item. Has anyone solved this issue? Is there some other way to accomplish the goal with a lower risk approach? If so, what potential benefit does this alternate bring.? As each person makes a suggestion, notes should be taken in every ENB with your reaction to the ideas and suggestions (positive, neutral, or negative and why). If you can't think of anything to add, you can pass your turn in the round-robin.

When everyone passes, study the map of activities for the rest of the week and then move on to producing a personal outline of a plan for the rest of the week. Remember, there could be surprises, so don't be too specific.

Deliverable

Students are responsible for producing and posting notes in their ENB as evidence that they performed this task as required.

Submission

Each student must produce and submit your ENB for the day.
