

# **Individual Activity - Produce your screencast**

Lynn Robert Carter, PhD

2019-02-26

## **Activity Kind**

Individual activity

## **Purpose**

The purpose of this activity is to produce a screencast that does an accurate and professional looking and sounding job of showcasing your work.

## **Pre-requisite**

Students are expected to have most of the work on the calculator and performed the following:

- Small Group Activity - Establish prioritized list of items to present in this week's screencast.
- Individual Activity - Produce an outline and activity script for this week's screencast.

## **Tasking**

Leverage the ideas from the previous activities and work to produce a screencast you will be proud to show to others. Use the supplied rubrics as a checklist and the guidance provided to you by your mentors.

As you produce this screencast, you are likely to see or think about things that should or need to be changed. Capture those in your ENB so you do not forget about them.

## **Deliverable**

Students are responsible for capturing their accomplishments, insights, doubts, problems, and concerns in the ENB.

## **Submission**

Each student must produce and submit the ENB submission prior to midnight.
