Individual Activity - Submit the project, documentation, and screencast

Lynn Robert Carter, PhD

2019-02-28

Activity Kind

Individual activity

Purpose

Submit your final project deliverable.

Pre-requisite

Students are expected to have participated in the peer reviews of their final project and the final work session.

Tasking

Follow your mentor guidance on how to submit your project.

Check to ensure that your project is properly named and that it only contains the final calculator with any supporting test mainlines. Please export your project into a properly named ZIP archive. Your mentor **must** be able to import your project and get it to work as shown in your screencast without making any changes!

Be sure your Eclipse archive, your documentation (Requirements, UML Diagrams, and any other that you believe will help others understand your work) and your screencast have been placed in a properly named folder.

Now produce a ZIP archive of that folder and submit is as directed by your mentor.

Deliverable

The deliverable was described above.

Submission

Submit the deliverable according to your mentor's guidance.
